

Do you really believe that our country is better off today than it was during Biden's presidency?

Do you believe that Biden is/was neurologically solid during that time??

How many dangerous wars do we have going on now?

Do you seriously think that the open border is best for Americans? To allow anyone into this country that hasn't been vetted?? Does anyone entering illegally have any rights? What about the costs to the U.S. in illegal individuals? What about all the unknown terrorists and criminals entering with a free pass, not including the "got aways?"

Do you really believe that we should be teaching our 5 years olds about transgenders? Is that seriously necessary? Is that what our young children need to know??

Do you think our American children should not learn about patriotism to our country??

Do you really think this is a democracy when the person our country elected is not the person who is in charge? That's democracy??

The DOJ and its various agencies have been weaponized to do lawfare against any opponent, like in banana republics? Has anyone in the US been persecuted like Trump because the liberals are so afraid he will be re-elected?

And what about the Biden family? Does it ever get any more corrupt than the Biden family with countless fake companies, money laundering from foreign entities?

Our whole system is broken!! Professional politicians who have never held a real job. How can they possibly represent the average Joe in America??

Let's stop the BS and unite.
