

The War on Whites

The Progressive Left and the media intentionally wish to drive our citizenry into a civil war that pits all races against white people.

This war began as a war on our traditional American culture. However, the war has blatantly been expanded to a war on the white race specifically.

Our country has groups like ANTIFA and BLM attacking citizens that dare to walk the street wearing a hat proclaiming, "Make America Great Again" and yet the media bombards us with "white supremacy"?

When did being born white become a crime? When did supporting one's president become a crime? Finally, when did loving one's country become a crime?

Leftist terrorists are free to attack someone simply because they disagree politically? Such is the real Obama legacy the Left so longed for: a divisive nation, with enemy lines drawn by color, gender, religion, and so on.

The Left tears the fabric of America apart using identity politics. And all to get to America's guns, the last line of defense for the Average Joe to protect himself. But not from the many criminals the Left has created, but from a tyrannical government that would have no limits.

A government that attempted a coup against a presidential candidate, and a coup attempt that continues to this day.

Witch hunts and hoaxes, from Russia to racism, the Left continue looking in its bag of tricks. Blame "whitey", while completely ignoring the black-on-black crime pervasive in Chicago, Cleveland, Baltimore, and almost all major Democrat-controlled cities in America. Then dismiss the black-on-white crime almost as pervasive. Their implement of destruction? Illegal firearms.

No, all firearms, because, it's the white man's fault and he has the "legal" guns.

If Americans do not take a stand to protect their 2nd Amendment and allow this attack on whites to continue, then shame on us. History teaches us not to judge people by the color of one's skin. Apparently, the Left skipped that day in Civics class.

America is not made up of colors of people. We define ourselves by one American culture.
