

# The difference between Capitalism and Socialism

<https://www.facebook.com/TheRepublicanPatriots>, August 11, 2026

Japan rose from the ashes of two nuclear bombs into a global economic powerhouse through free markets, hard work, and capitalism.

Cuba remains a crumbling socialist failure after 70 years.

The contrast is impossible to ignore. One system produces prosperity and innovation. The other produces poverty, shortages, and decay no matter how long it is tried.

Socialists in America still push the same failed ideology while ignoring every real-world example of its destruction. Results never lie.

Reject socialism in every form and defend free enterprise! Support America First policies that build wealth instead of destroying it!
